

README_FOR_LEI_UPLOAD

LEI Case 001 - John Doe H-1B Initial Intake Packet

FICTIONAL / TEST DATA / NOT VALID FOR ANY REAL IMMIGRATION FILING

This packet simulates documents a legal team may receive from HR and a foreign national when preparing an H-1B petition.

Workflow Stage

initial_intake

Intended Case Type

H-1B cap change of status for an F-1 STEM OPT employee.

Testing Principle

This packet intentionally includes only documents that HR or the foreign national would plausibly provide during initial intake.

It does **not** include:

- Certified LCA
- H-1B support letter
- Form I-129
- H Supplement
- G-28
- Filing fee checks
- Attorney-drafted legal memo
- Attorney-drafted employer support letter

Those documents are normally created by the legal team after intake review.

Case Summary

- Petitioner: Northstar Data Systems, Inc.
- Beneficiary: John Doe
- Country of citizenship: India
- Proposed position: Software Engineer I
- Location: Atlanta, Georgia / hybrid remote

- Current status: F-1 STEM OPT
- Intended H-1B start date: October 1, 2026

Folder Contents

HR-Provided Documents

- HR Intake Questionnaire
- Offer Letter
- Job Description
- Company Profile
- Text Org Chart
- Remote Work Policy Excerpt
- Compensation Confirmation

Foreign-National-Provided Documents

- Beneficiary Intake Questionnaire
- Resume
- Fictional Passport Data Page Specimen
- I-94 / Status Summary
- Fictional STEM OPT EAD Specimen
- Paystub Summary
- Travel History Summary
- Address History Summary
- Fictional Degree Verification Specimen

The passport, STEM OPT EAD, and degree verification documents are visual specimens mixed into the foreign-national-provided documents folder. They are marked **SPECIMEN / FICTIONAL TEST DOCUMENT / NOT VALID**.

Do Not Upload Attorney Answer Key

The attorney-only answer key is in a separate folder and should not be uploaded to LEI during testing.

HR notes that John works remotely from his home office two days per week.

Known home address from HRIS: 250 College Avenue, Apt 304, Athens, GA 30601

HR is unsure whether the home office should be included in immigration worksite analysis.

Job Requirements

Minimum education required: Bachelor's degree in Computer Science, Software Engineering, Computer Engineering, Information Systems, or a related technical field.

Experience required: 0-2 years of software engineering or software development experience.

Will accept foreign degree equivalent: Yes.

Will accept combination of education and experience: Please confirm with legal team.

HR Notes

John is currently working under STEM OPT. HR would like legal to prepare an H-1B cap petition requesting change of status effective October 1, 2026.

HR has not prepared an LCA or immigration support letter.

Offer Letter

Offer Letter

FICTIONAL / TEST DATA / NOT VALID FOR ANY REAL IMMIGRATION FILING

August 21, 2026

John Doe 250 College Avenue, Apt 304 Athens, GA 30601

Dear John,

Northstar Data Systems, Inc. is pleased to offer you the position of Software Engineer I, reporting to Priya Shah, Director of Engineering. This is a full-time, exempt position based out of our Atlanta, Georgia office.

Your anticipated start date in this role is October 1, 2026. Your annual base salary will be \$87,500, paid in accordance with Northstar Data Systems, Inc.'s standard payroll practices. You will also be eligible for standard company benefits and an annual discretionary bonus.

Your primary work location will be Northstar Data Systems, Inc.'s Atlanta office located at 1180 Peachtree Street NE, Suite 2100, Atlanta, GA 30309. Northstar Data Systems currently permits eligible engineering employees to work on a hybrid schedule, subject to business needs and company policy.

This offer is contingent on your continued authorization to work in the United States. Nothing in this letter creates a contract for a fixed term. Your employment with Northstar Data Systems, Inc. is at will.

Sincerely,

Maria Bennett HR Business Partner Northstar Data Systems, Inc.

Position

Software Engineer I

Department

Engineering - Platform Integrations Team

Reporting Manager

Priya Shah, Director of Engineering

Job Summary

The Software Engineer I will help design, develop, test, and maintain backend services and integration tools for Northstar Data Systems, Inc.'s enterprise data platform. The role supports API integrations, data validation workflows, application reliability, and internal engineering tools.

Duties

- Develop backend services using Python, TypeScript, and SQL.
- Build and maintain API integrations used to connect customer systems to the Northstar data platform.
- Write unit tests, integration tests, and documentation for internal APIs.
- Assist with debugging, performance monitoring, and production issue triage.
- Collaborate with senior engineers, product managers, and implementation teams to convert product requirements into technical tasks.
- Participate in code reviews and sprint planning.
- Maintain internal tools used by implementation and customer success teams.
- Support data validation and transformation logic for customer reporting workflows.

Approximate Time Allocation

- Backend service development: 35%
- API integration development and maintenance: 25%
- Testing, debugging, and documentation: 20%
- Cross-functional product and engineering collaboration: 10%

- Internal tools and platform support: 10%

Minimum Requirements

Bachelor's degree in Computer Science, Software Engineering, Computer Engineering, Information Systems, or a closely related technical field.

Preferred Requirements

- Academic or professional experience with Python
- Academic or professional experience with SQL
- Familiarity with cloud platforms, APIs, or distributed systems
- Strong written and verbal communication skills

Company Profile Provided By HR
